TECHNICAL STACK

Python · Pandas · NumPy
SQL · BigQuery · PostgreSQL
Power BI · Looker Studio
ETL / ELT Pipelines
Machine Learning
pgvector · RAG · Embeddings
React · TypeScript · Next.js
Firebase · Supabase · GCP
n8n · Make · No-Code
Gemini AI · OpenAI APIs
Vitest · Playwright (E2E)
AutoCAD · OPUS · Office 365

LANGUAGES

Spanish *Native*
English *Advanced*
German *Basic*

EDUCATION

Master's in Business Analytics & AI
INESDI Business TechSchool
Madrid · 2025 – 2026

B.Sc. in Electrical Engineering
TECNM CHIHUAHUA · 2018–2023
GPA: 92.7 / 100

CERTIFICATIONS

Electrical Power Systems
Univ. at Buffalo · Feb 2023

PVC-Coated Conduit Installer
Plasti-Bond · Apr 2024

PROFESSIONAL PROFILE

Recent graduate of the Master's in Business Analytics & AI (INESDI, 2026) with a background in Electrical Engineering and real-world experience managing complex projects for **Microsoft and BMW Group**. During the Master's I independently built three production-grade full-stack applications with AI, ETL pipelines, RAG architectures, and analytical dashboards. Seeking a Junior Data or Artificial Intelligence role where I can deliver value from day one.

PERSONAL PROJECTS & PORTFOLIO

Bocado AI — AI-Powered Nutrition App *2025 – present*

Personal Project · Full-Stack

React 19 · TypeScript · Firebase · BigQuery · Gemini AI · Looker Studio · n8n · CI/CD

- Production full-stack architecture: React 19 + TypeScript + Vite frontend (Zustand, TanStack Query, React Hook Form + Zod), Firebase backend (Auth, Firestore, Storage, Cloud Functions Node.js 20), deployed on Vercel with PWA support.
- Complete quality pipeline: unit tests with Vitest, component tests with Testing Library, multi-browser E2E with Playwright, CI/CD via GitHub Actions, and production error monitoring with Sentry.
- Integration of Gemini AI for personalized meal plan generation, and node-cache for Cloud Function performance optimization.
- Firestore → BigQuery data pipeline with SQL views for user behavior analysis; Looker Studio dashboards as product KPI tracking complement.

CoverCraft — AI Cover Letter Generator (SaaS) *2026*

Personal Project · Full-Stack

Next.js 15 · TypeScript · Supabase · n8n · TipTap · next-intl · PDF export

- End-to-end SaaS: user uploads CV, n8n orchestrates AI (Gemini/OpenAI) via webhook, generates a tailored letter persisted in Supabase and exported as professional PDF.
- Full multilingual support (ES/EN/FR) in UI and generation logic with next-intl. Custom SSR middleware in proxy.ts for secure route protection.

PDF Technical Assistant — RAG Chatbot *2025*

Personal Project · Full-Stack

React 18 · Firebase Functions · Supabase pgvector · Gemini AI · Vitest

- Complete RAG system: PDF extraction, intelligent chunking, Gemini embeddings (text-embedding-004), and semantic search in Supabase pgvector.
- 2 serverless Cloud Functions: automatic pipeline on PDF upload and chat endpoint with persistent history and per-user data isolation.

WORK EXPERIENCE

Electrical Construction Resident *Jan 2024 – Feb 2025*

DEMEK S.A. de C.V. · Querétaro, Mexico

- Management of requisitions and material tracking across three simultaneous electrical fronts at the Microsoft Data Center Querétaro: medium voltage, exteriors (switch rooms, lighting, civil works), and exterior electrical rooms — zero supply stoppages over 14 months.
- Supervision of full electrical installation of a building at the BMW Group plant (San Luis Potosí) and plant-wide requisition tracking — coordination of subcontractors and on-site technical liaison with the client.
- Verification of technical compliance and safety standards in the field throughout the full project lifecycle on both assignments.

Electrical Budget Analyst *Jan 2023 – Jan 2024*

DEMEK S.A. de C.V. · Chihuahua, Mexico

- Execution of the full budgeting cycle: reading AutoCAD drawings, quantifying materials, inputting into OPUS, requesting and comparing supplier quotes, applying company overhead, and submitting for client review — with award of the Terex project in Nuevo Leon.
- Preparation and delivery of financial proposals in PowerPoint to clients, covering scope, cost breakdowns, and post-review adjustments for non-technical decision-makers.
